Hazardous Waste Program
EPA Region VIII

April 1, 1981

Mr. John Minkoff, Mail Code 8AH-WM/ON
U. S. Environmental Protection Agency, Region VIII
1860 Lincoln Street
Denver, Colorado 80295

Dear Mr. Minkoff:

Ashland Chemical's Industrial Solvents and Chemicals Division plant (EPA I.D. #COT090010026) located at 3350 South Zuni in Sheridan, Colorado is not a treatment, storage, or disposal facility as defined by the RCRA regulations. We would like to remain registered as a generator and a transporter in the event that we may not be able to sell our line flush solvents for beneficial reuse. We have not as yet used a RCRA manifest as a hazardous waste generator because our line flush solvents have all been sold since November 1980.

Yours very truly,

Arlene A. Hendrickson
Environmental Engineer
